

# KC Book

## All the great innovators understood the importance of The Book

From the original printing of them, to copying them, to building software and computers to design them, great innovators like Gutenberg , Carlson , Jobs and Gates all knew how important Books were to communication, education, society and commerce.

Insurers can't insure, Lawyers can't prosecute and Educators can't teach without reference to large amounts of information and data, mostly in the form of documents. So today's users still need to open and search complex compound documents easily and quickly, regardless of page formats or the data sources used to create them.

Even in companies that have a good Document Management System (DMS), accessing the breadth of information and data necessary can be slow and clumsy . Consequently, often to overcome this , many users resort to keeping a cache of copies of documents, thus undermining the purpose of efficient document management whilst wasting time, using excessive storage and running the risk of operating with out of date documents and data.

There is a better way to store and access complex documents. **The Book** from KnowledgeCenter addresses these issues and provides an easy to use Platform and format to Create, Manage and Access your complex , multi-sourced Business documents.

### Create Books easily and quickly

- ✓ From documents in many formats and orientations
- ✓ From documents in any location at any time
- ✓ From documents coming from many systems via the DMS

### Manage your Books

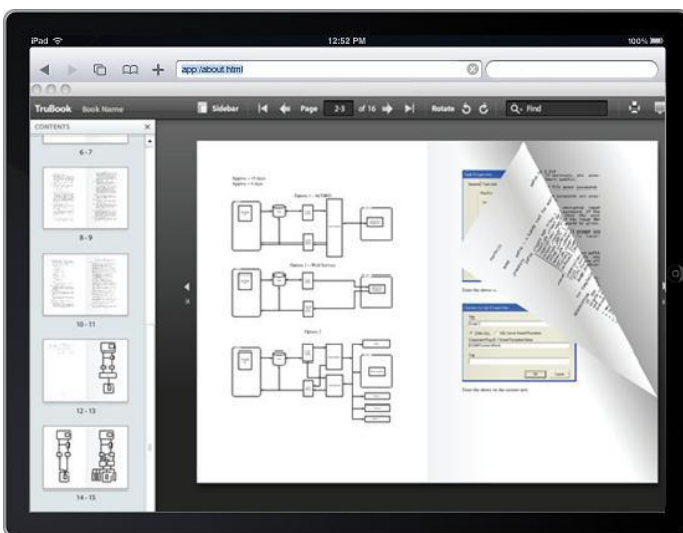

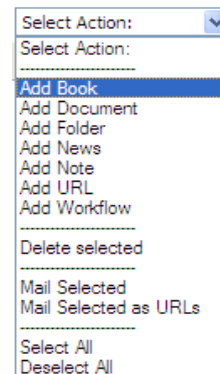

- ✓ Automatically update them from process rules
- ✓ Put the pages and chapters in any order
- ✓ Automatically create tables of contents
- ✓ Manage versions of book and versions of all the pages and chapters

Gutenberg's Printing Press  
1436

### Access and distribute your Books

- ✓ View them from an internet browser
- ✓ View in any orientation ,in any order
- ✓ Zoom in and out and pan for ease of reading
- ✓ Flick through pages just like a book, navigate to indexes, or click on easy thumb nails
- ✓ Export your books as Flash™ or PDF, and in the future, view with portable notepad applications
